

The Full Bibliography of Alan Rodgman

by Charles R. Green

430 Burkert Court, Winston-Salem, NC, 27104, USA

This chronological bibliography of Alan Rodgman's lifetime publications covers 66 years reporting his research and analysis of scientific data. The entries span his academic research, company-sponsored investigation of tobacco and smoke chemistry, data analysis during his consulting years and personally motivated publications reflecting upon his knowledge base of tobacco and smoke research. It should be noted that the crowning achievement of his publications, i.e., the second edition of *The Chemical Components of Tobacco and Tobacco Smoke*, was published in the year of his death. He was active to the very end.

We who collaborated with Dr. Rodgman were always confident that our research would be reported accurately, grammatically correct, even the most complex chemical structures properly named and pertinent literature fully cited.

The basis for this bibliography principally comes from a list maintained by Alan Rodgman himself. I thank Drs. Tom Perfetti and Mike Ogden for assisting me in reviewing the information. [Beitr. Tabakforsch. Int. 26 (2014) 34–36].

1. Franks, W.R., E.M. Batho, H.J. Creech, L.F. King, M.M. Shaw, M. O'Sullivan, C.D. Caudwell and A. Rodgman: Chemoantigens and carcinogenesis; Ann. Rpt., Ontario Cancer Treatment & Research Foundation (1947) 41–42.
2. Franks, W.R., A. Rodgman and W.K. Brown: Chemoantigens and carcinogenesis; Ann. Rpt., Ontario Cancer Treatment & Research Foundation (1948) 53–54.
3. Franks, W.R., J. Manser and A. Rodgman: Synthesis and testing of anticarcinogens including chemoantigens; Ann. Rpt., Ontario Cancer Treatment & Research Foundation (1949) 75–77.
4. Rodgman, A. and W.R. Franks: Reaction of thyroxine with aromatic isocyanates; J. Am. Chem. Soc. 74 (1952) 6296–6297.
5. MacKenzie, J.C.J., A. Rodgman and G.F. Wright: Diels-Alder additions with dialkyl azodicarboxylates and azo-bis-formamidine; J. Org. Chem. 17 (1952) 1666–1674.
6. Brook, A.G., A. Rodgman and G.F. Wright: Oxymercuration of 2,6-dimethylhepten-5-ol-2; J. Org. Chem. 17 (1952) 988–999.
