From Boxing to Philosophy

Jerzy Kosiewicz

Josef Pilsudski University of Physical Education in Warsaw, Poland

ABSTRACT

This article begins the cycle of portraits of the members of the Editorial Board and Editorial Advisory Board of the journal *Physical Culture and Sport. Studies and Research*, who are eminent social scientists researching the issue of sport. Among them, there are many world-class professors, rectors and deans of excellent universities, founders, presidents and secretaries-general of continental and international scientific societies and editors of high-scoring journals related to social sciences focusing on sport. The journal *Physical Culture and Sport. Studies and Research* started its activities in 2008 and gathered many readers, distinguished authors and outstanding reviewers. It is worth taking a moment to present the profiles of the individual editors, thanks to whom the journal keeps getting better and better. The journal is increasingly appreciated internationally particular among the scientists from the humanist and social areas of investigations. The rapidly increasing number of its readers and its surprisingly wide reception, indicated by the number of visits and downloads in English-speaking countries, including hundreds of universities (up to 791 were interested in the content of issue 62 of our magazine), research institutes and related libraries, as well as academics, researchers and students, should be celebrated. These data are derived only from one bibliographic data base (EBSCO). It must be noted that the journal is indexed in 43 bases.

Portraits presenting the journal's editors include, among others, their most important professional, organizational and scientific achievements. Each subsequent issue of PCSSR will include one such portrait. We shall begin with the portrait of Professor Jerzy Kosiewicz, Ph.D., who is the Editor-in-Chief of the journal.

Education and sporting achievements

Professor Jerzy Kosiewicz was born on 13 October 1949 in Wrocław. He attended elementary school (No. 150) and high school (XIX LO) in Łódź. In his high school and later years, he practised boxing. He won a bronze medal at the Junior Polish Championship in 1967 in Włocławek in the light middleweight class, and he represented Poland twice in fights with Hungary and the German Democratic Republic, which then had very good boxers. He fought several international fights. He was also a part of the Polish youth team and I-league team Gwardia Łódź. He has II dan in aikido and III dan in jujitsu.

He was a student at the Academy of Physical Education in Warsaw, and in 1973 received a master's degree in physical education with a diploma of class II boxing coach, judo instructor and massage specialist. In 1983, he graduated from the University of Łódź with the title of Master of Philosophy. He also studied

cultural studies (specializing in theatre studies) at the same university's Faculty of Philology, and in 1986 he received a master's degree in theatre studies. He is also a graduate of Postgraduate Religious Studies at the Faculty of Social Sciences (1984).

His Ph.D. dissertation on the concept of man in the theory of physical culture (published after modifications under the title "Physical culture, personality, upbringing. Methodological issues," in Warsaw, 1986) was defended in 1984 at the Academy of Physical Education in Warsaw, granting Jerzy Kosiewicz a Ph.D. in physical education. The thesis was supervised by Professor Zbigniew Krawczyk. The habilitation colloquium was held in 1992 at the Cultural Institute of the Russian Academy of Sciences regarding the thesis entitled "The body and spirit as the object of Christian philosophical culture." The condition for admission to the colloquium was Jerzy Kosiewicz's book, entitled *Man and His Body in the Orthodox and Catholic Doctrine* (Moscow, 1992). As a result, the professor obtained the degree of "doktor habilitowany" (dr hab.; a Polish academic degree higher than a Ph.D.) in humanities in the field of philosophy. He underwent the habilitation procedure in Russia on the basis of his study of philosophical anthropology of the Russian Orthodox Church (mainly because of the need to use the so-called "prohibited materials," then only available with the special permission of the authorities in Moscow in the Library of the Russian Academy of Sciences INJON).

He obtained the degree of professor in 2003, and he was appointed as professor at the Józef Piłsudski Academy of Physical Education in 2004.

On 6 November 2009, he was awarded the title of Doctor Honoris Causa by the Senate of Semmelweis University in Budapest on the occasion of the 240th anniversary of the medical university, which has been such an important place for European education.

He was also appointed as a member of the Commission of the Ministry of Science and Higher Education, evaluating proposals for the "Diamond Grant" in the years 2012-2014 and 2015-2017.

In 2014, Professor Jerzy Kosiewicz also became a member of the International Board of Advisors of the prestigious association of the American Sports Institute, located in Mill Valley, USA.

In 2016, he was elected to be a board member of the Warsaw Branch of the Polish Philosophical Society.

In addition, Professor Jerzy Kosiewicz as Editor-in-Chief has also published 26 editions (volumes) of the magazine Physical Culture and Sport. Studies and Research, which is now a quarterly. The amount of work related to each particular edition of the journal is much larger than editing and doing other work connected with issuing a collective work in a foreign language. The process of issuing the journal includes publishing both an electronic version and a printed one.

Publish and Perish, the widely available software created by Anne-Will Harzik and treated as a tool for researching the influence and citation of authors, shows (data retrieved on 30.05.2016) that Professor Jerzy Kosiewicz's work has 358 citations. Other Polish social scientists researching sport have achieved the following number of citations: Professor A. Pawluki: 118; dr hab. M. Kazimierczak: 67; Professor Z. Dziubiński: 55; Professor J. Nowocień: 45; A. Smoleń, Ph.D.: 45; Professor A. Przyłuska: 34; dr hab. T. Michaluk: 26; Dr. M. Zawisło: 12; dr hab. H. Zdebska: 7.

It should also be noted that, for example, issue 62 of the journal *Physical Culture and Sport. Studies and Research*, which includes a monograph by Jerzy Kosiewicz entitled *Sport and Normative Ethics: Philosophical Studies*, raised the interest of 791 (almost exclusively) English-speaking universities and research institutes from around the world in 2015. Academics, researchers and students entered the site and downloaded the content of the journal 1,770 times, based on data provided only by EBSCO, one of the 42 citation databases that are interested in *Physical Culture and Sport. Studies and Research*.

In the last three rankings of authors for 2013-2016 (as of 02.06.2016) regarding scientific publications at the Academy of Physical Education, Professor Jerzy Kosiewicz is ranked number one for the most published author based on the following:

10. Polish Society of Religious Studies (PTR - member since 1982),
11. Polish Societies of Social Sciences on Sport (PTNSS - founder in 2009, and has since served as president),
12. Polish Society for Sciences of Physical Education (PTNKF - member since 1982),
13. International Material Arts and Combat Sports Scientific Society (IMACSSS - member since 2011).

He has also been a long-standing member of the following scientific societies: European Association for the Management of Sport, International Sport and Culture Association, International Academy of Sport for All and the International Academy for Sports Leaders.

Professor Jerzy Kosiewicz is also involved in theatre. He has been a member of the Association of Polish Artists since 1997 and the International Federation of Actors (FIA) since 1997. He served for many terms and remains involved as deputy chairman of the Section of Theatre Critics. He has also served as chairman of the Distinctions Committee of ZASP (Polish Actors' Association), member of the Committee for the Creation of the Institute of Theatre Arts and member of the Program Council of the Association. He is now a member of the Committee for Monitoring the Situation of Public Theatres in Poland and the Working Group for Creating the Book of Good Practices.

Although he is currently less active than he used to be, Professor Jerzy Kosiewicz is also a theatre critic and reviewer. He has published more than 40 articles related to theatre, and several on film theory.

Teaching achievements and supervised theses

Professor Jerzy Kosiewicz gives lectures and teaches classes at the Faculty of Physical Education in the history of philosophy, philosophy of man, and philosophy of nature and ethics. He also conducts MA and BA seminars and classes in philosophy and ethics, as well as separate classes on ethics in English for foreign students within the framework of the Erasmus Programme.

He has also been the supervisor of over 300 MA and BA theses at AWF in Warsaw (and the branch in Biała Podlaska), Rzeszów University, the Economic and Technical University in Legionowo, the State High Vocational School in Biała Podlaska and the High School of Pedagogy and Administration in Poznań.

For several years, Professor Jerzy Kosiewicz has conducted classes for post-graduate students in the field of general methodology as a philosophical discipline (in particular, regarding empirical sciences and the humanities), the history of philosophy and formal logic.

He has also been invited to several foreign international conferences of students as a juror and a member of scientific committees.

Professor Jerzy Kosiewicz has supervised 8 Ph.D. theses:

1. Jakub Mosh, Ph.D. - "The image of professional sports in the Polish documentary film", 1997,
2. Wojciech Cynarski, Ph.D. - "Far Eastern martial arts in Western culture", 1998,
3. Konrad Zieliński, Ph.D. - "The concept of man in the Polish theory of physical education", 2000,
4. Jarosław Kudelski, Ph.D. - "Sources and transformations of ideology and philosophy of Olympism," 2003,
5. Joanna Femiak, Ph.D. - "The concept of the body in the sciences of physical culture", 2005,
6. Tomasz Wasążnik, Ph.D. - "The system of values in physical culture and postmodern crisis of culture", 2015,
7. Rafał Biały, Ph.D. - "Personalism and competitive sport", 2015,
8. Zoltan Marczinka, Ph.D. from Hungary - "The decisive factors that influence success in handball: Based on the analysis of a World Championship", 2015.

Professor Kosiewicz is now supervising the theses of two other graduate students.

One of the above Ph.D. students, dr hab. Professor Wojciech Cynarski, was awarded the title of professor by the Central Commission for Academic Degrees and Titles at the end of 2015.

Professor Jerzy Kosiewicz has also supervised two academics of the Department of Philosophy, which he is heading, in achieving the degree of doktor habilitowany (a Polish academic degree higher than Ph.D.):

- Alicja Przyłuska-Fischer, Ph.D., in 1997 – Rector of the Academy of Physical Education in Warsaw in the years 2008-2012,
- Henryk Benisz, Ph.D., in 2001.

Przyłuska-Fischer received her degree on the basis of the thesis "Ethical aspects of the dispute on abortion" (Warsaw, Physical Education Publishing House, 1997) at the Institute of Philosophy of the University of Warsaw in 1998. She was awarded the title of professor in 2015. Henryk Benisz, Ph.D., received his degree on the basis of the thesis "Nietzsche and Dionysian Philosophy" (Warsaw, Physical Education Publishing House, 2001) at the Institute of Philosophy and Sociology of the Polish Academy of Sciences in 2002.

In the Department of Social Sciences and the Department of Philosophy and Sociology headed by Professor Jerzy Kosiewicz, the following academics obtained the degree of doktor habilitowany: Jolanta Zyśko, Ph.D.; Krzysztof Jankowski, Ph.D.; Michał Lenartowicz, Ph.D.; and Zbigniew Dziubiński was promoted to be a professor in 2014.

Professor Jerzy Kosiewicz participated in 4 foreign habilitation procedures:

1. The first was related to the dissertation of Ivo Jirasek, Ph.D., from Palacky University in Olomouc (2006),
2. The second was initiated and finalized in 2007 at the University of Prešov and concerned Stanisław Cieszkowski, Ph.D.,
3. The third concerned Zbigniew Barabas, Ph.D., and was initiated at the University of Prešov in 2011,
4. The fourth concerned Emilian Zadarko, MD, Ph.D., at Univerzita Mateja Bela in Banská Bystrica in 2013.

Professor Jerzy Kosiewicz also participated 5 times in foreign procedures related to obtaining the academic title and degree of professor:

1. Professor Anna Hogenova from Charles University in Prague; the procedure was initiated at Palacky University in Olomouc,
2. The above-mentioned Professor Ivo Jirasek of Palacky University in Olomouc,
3. Professor Aleš Sekot of Masaryk University in Brno,
4. Professor Ludmila Fialova of Charles University in Prague,
5. Professor Jarmo Liukkonen from the University of Jyväskylä in Finland.

Professor Kosiewicz has also reviewed four doctoral theses at Semmelweis University in Budapest.

Three Ph.D. theses were prepared under the supervision of Professor Dr. Gyöngyi Földesi:

1. The thesis of Lappas Kleomensis, "On the Deviant Behavior of Greek Football Spectators" (2005),
2. The dissertation of Antonis Alexopoulos, "Sport in the European Union from a Cypriot Perspective" (2007),
3. The Ph.D. work of Diana Christodoulou, "Social Status of Qualified Physical Education Teachers in Cyprus" (2011),
4. The fourth thesis by Hamidrez Mirsafian, Ph.D., entitled "Constraints in Physical Activity and Sport: A Comparative Study Between Hungarian and Iranian Students" (2014), was written under the joint supervision of Professor Gyongyi Földesi and Gabor Geczi, Ph.D.

Professor Jerzy Kosiewicz has also reviewed 3 doctoral dissertations in the field of social philosophy at the Catholic University of Lublin:

- The doctoral dissertation of Piotr Szulich, "Adam Rodziński's concept of social personalism" (2002),
- Tomasz Czernik's thesis, "The concept of man and community in the views of George Santayana" (2003),
- The Ph.D. thesis of Stanisław Srebro, entitled "Józef Tischner's concept of social life" (2006).

The supervisor of these theses was Professor Stanisław Kowalczyk.

Professor Jerzy Kosiewicz has reviewed several dozen doctoral theses, dissertations and other works connected with granting the degree of professor.

Academic interests

Generally speaking, the academic interests of Professor Jerzy Kosiewicz primarily concern research in the field of philosophical anthropology (on the sources and transformations of the Christian concept of the body), the philosophy of religion, ancient Greek philosophy, general methodology and the philosophy of physical culture and sports. He has also dealt with issues related to the cultural and educational aspects of tourism and recreation.

In his works, Professor Jerzy Kosiewicz has often taken a controversial new approach to commonly accepted issues and assumptions. This includes denying the existence of the philosophy of sport as an independent and mature field of study and rejecting the whole concept of free time in the philosophical (e.g. in the Aristotelian) and non-philosophical sense for the sake of the concept of busy time both in the case of human life and the life of other organic beings. He also believes that one should not consider sport activity from the point of view of good and evil, i.e. of morality. In the context of the achievements of Pythagorean astronomy and the philosophy of space, he also disputes the uniqueness of the so-called Copernican revolution. Many find it controversial that he indicates that one of the main sources of anthropology, culture and European theatre is, in terms of its inspiration, a multifaceted concept of Eros (representing the philosophical base of the Platonic philosophy of culture) and the practical sense of the activity of Bacchantes, in particular their

carnivalised religious forms. He follows Karl Popper, Thomas Kuhn and Imre Lakatos in negating the concept of the use of hypotheses in empirical sciences.

Professor Jerzy Kosiewicz also focuses his attention on axiological problems related to the exploration and study of the source, meaning and ways of the manifestation and impact of values in general as well as in physical culture and sport. He has also dealt with issues from the field of philosophical anthropology, the analysis of the human being in the light of the dynamic theory of man and interpretation of the subject as a being composed of three ontic layers: relational (social), ideal (mental) and material (physical). This created the basis for formulating – on the grounds of the philosophy of physical culture – the concept of the personality and health of ontological and phenomenal status, understood as entities that may or may not appear, and if they exist, they exist as ontic fact, mediated in man and in society, which means that they can be considered from the ontological point of view.

Thus, personality and health for Professor Jerzy Kosiewicz form the foundation for a recognized philosophical pedagogy of physical culture – the field whose aim is to educate, develop and improve man according to the goals and ideals of education connected with axiology, the source and meaning of physical culture. Reflection on the pedagogy of physical culture has been interpreted in the light of the general principles of Hessen's philosophy of culture and education as a part of the philosophy of physical culture, that is, as a philosophy of implementing the established world of values, and on this basis changing the ontic layers of the individual and the individual's personality and health, developing and shaping the human being as the subject of culture and civilization.

The academic interests of Professor Jerzy Kosiewicz also include methodological issues, i.e. the analysis of the logical structure of optimization propositions in pedagogy and pedagogical assumptions of physical culture on the basis of the theory of physical education and other sub-disciplines within the scope of this pedagogy (health education, education through sport, education in praxeological terms, theory of training and theory of combat sports). He arrived at the conclusion that the pedagogy of physical culture (and its sub-discipline) is a classical practical field, within which one specifies aims, sets of values, ideals of education and the personality and health of a teleological and optimization character, while also determining how they should be implemented, including the areas and options of practical activities. These concepts have been considered by Professor Kosiewicz and enriched with extensive deliberations in the field of general methodology and the philosophy of science and science studies, which he presented, among others, in the works "The methodology and hypothesis", "Methodology as a form of agnosticism" and "Verification and hypothesis".

He also focuses his academic attention on the issues of the body in Christian anthropology from a historical perspective, from Orphism to the present times. These are the subjects of his three frequently reprinted books: *God, Corporeality and Violence* (1997), *Early Christian and Catholic Reflection on the Body* (1998), *God, Corporeality and Love* (1998) and the monograph published in Moscow under the title *Man and His Body in the Orthodox and Catholic Doctrine* (1992, Russian Academy of Sciences). The above works cover more than three thousand years of religious, theological and philosophical reflection of the European culture, where the author emphasizes the Judaic and Hellenic roots of Christian anthropology and how the early Christian foundation formed for the development of the Catholic concept of man and varied relations to the human body. These works also present an analysis of the contemporary form of Catholic anthropology, which is under the significant impact of biblical and Greek and Roman ideas of man. They also discuss the attitude of Russian Orthodoxy and Protestantism to the human body and its needs. Reflections on ancient roots and various forms of Christian anthropology, and especially the concepts of the human body, are particularly helpful in explaining the negative attitude of the Christian Church to physicality and physical activity that has lasted for almost two millennia. This applies to the Patristic period: the early Christian, medieval, modern and present times. This explanation may be useful for understanding the reasons for reevaluating this stance of Catholicism, Orthodoxy and Protestantism in the twentieth century, as well as the far-reaching affirmation of the body and its needs in various forms of physical activity.

Kosiewicz's studies in the philosophy of religion and Christian anthropology have been commented on in the PWN Encyclopaedia of Religion and may be found under the entry "Kosiewicz" (Warszawa, vol. 6, 2003, p. 55).

Another sphere of the professor's philosophical inquiry is associated with ancient Greek philosophy and its influence on the thought and culture of the West. He emphasizes the birth and transformation of this philosophy, as well as its etymological, ontological, epistemological and anthropological grounds and conditions. In relation to these issues, he dwells on the religious and cognitive conditions of Pythagoreanism, refers to the relations between the agnosticism of Socrates and the modern epistemological scepticism and considers issues related to physicality, sexuality and erotic love in the context of the Platonic philosophy of culture saturated with divine elements: the frenzy of creativity, including the variously manifested desire for immortality. He inspects ancient perceptions of time in general, as well as their impact on the theories of being and time formulated by Descartes, Kant and Heidegger. This also applies to relations between the Pythagorean and post-Pythagorean philosophy of the universe and Copernican astronomy and its Kantian and Nietzschean reception. A manifestation of this activity is not only membership and participation in the seminars and annual conferences of the International Association of Greek Philosophy, but also many English-language publications recommended by this institution (the volume of these materials is 12,314 publisher's sheets). These include, among others:

- Kosiewicz, J. (2009). Plato's Eros and the issue of erotic love in the views of John Paul II. In K. Boudouris & M. Adam (Eds.), *Greek Philosophy and the Issue of Our Age*, vol. II, p. 146-167. Athens: Ionia Publications, 1.55 publisher's sheets,

This also applies to two books on the above issues which will be published in print by the end of this and the beginning of next year in English and Polish.

Since 2003, Professor Jerzy Kosiewicz has headed three international collaborative research groups in the field of the social sciences of sport that included representatives of 8 countries: Austria, Germany, Belgium, Czech Republic, Hungary, Estonia, Russia and Poland. The research subsequently included participants from 13 countries, including Finland, Denmark, Norway, Slovakia and Greece. These studies concerned:

1. Values and cultural patterns in sport (complementary-comparative study) - from 2003 to 2006,
2. Social and cultural values of sport - from 2006 to 2009,
3. Sport in the process of social and cultural transformations in Central Europe - from 2010 to 2013.

The above studies were conducted under the auspices of the Ministry of Science and Higher Education (and its earlier counterparts), Józef Pilsudski University of Physical Education in Warsaw and the European Association for the Sociology of Sport, as well as the International Society for the Social Sciences of Sport and the Polish Society of Social Sciences of Sports. All of the above-mentioned books that were published after 2003 (in English and Polish) have been associated with the above research and concerned mainly the philosophy and sociology of sport, the organization of physical culture and sports psychology and pedagogy.

In 2004, Professor Kosiewicz participated in two autonomous studies in the framework of grants from the European Commission carried out by:

1. The European Academy for Sports Leaders (under the auspices of the International Society for Sports and Culture) and
2. The European Academy of Sport for All (also under the patronage of ISCA).

Academic awards

Professor Jerzy Kosiewicz has received five ministerial awards for academic achievements:

He has received Individual Awards of the 1st Degree three times:

1. Minister of Physical Culture and Tourism in 1993,
2. Minister of Sport in 2005
3. Minister of Science and Higher Education in 2007

as well as the following:

1. Award of the 2nd Degree of the Minister of Science and Higher Education in 2011, and
2. Award of the 3rd Degree of the Minister of Health and Social Welfare in 1980.

He also received the 1st Degree Award of the Rector of the Academy of Physical Education in Warsaw and many Rector's 2nd and 3rd Degree awards.
