Letter from the Editor-in-Chief

Since January 2016, the Polish Journal of Medical Physics and Engineering has a new editorial board. At the outstart of my activity as a new editor-in-chief, I would like to thank the former editors and especially the former editor-in-chief, Prof Natalia Golnik, for their considerable input in editing the journal. I am aware of the fact that there is competition between numerous journals devoted to medical physics, therefore we must strive to the highest standards. I can promise that together with the other editors, Witold Skrzyński, Piotr Tulik, and with the support of the experience of Tomasz Piotrowski, we will make every effort in order to maintain the level of the PJMPE up to international standards. Many distinguished medical physicists and medical engineers agreed to participate in the Editorial Advisory Board. We thank them all very much.

The journal's title obliges us to keep its scope open to various applications of physics and engineering in medicine. However, it might be expected that the majority of the submitted papers will be devoted to the application of ionizing radiation in therapy and diagnostics. Nonetheless we hope that other topics of physics and engineering in medicine will also be represented. We encourage young scientists to publish their research in the Polish Journal of Medical Physics and Engineering. We realize that the preparation of a clear and concise text is not an easy task. Therefore, the editorial board will assist the young researchers under 35 years of age in the preparation of their texts. In the name of the editorial board and my own, I cordially invite and encourage everyone to publish their research in the Polish Journal of Medical Physics and Engineering.

Paweł Kukołowicz, Associate Prof.
Editor-in-Chief
Polish Journal of Medical Physics and Engineering
