

## Editorial Policy

### 1. Introduction

The International Journal of Bioelectromagnetism (IJBEM) is an Open Access journal. All articles are available free in both print and electronic form for a non-commercial purpose. Therefore, authors are asked to indicate their agreement to abide by an open-access license. The license permits any user to download, print out, extract, archive, and distribute the article, so long as appropriate credit is given to the authors and source of the work. The license ensures that your article will be as widely available as possible and that your article can be included in any scientific archive.

The articles submitted to IJBEM must be previously unpublished and not be under consideration for publication elsewhere. If related work has been submitted elsewhere, then a copy must be included with the article submitted to IJBEM. Reviewers will be asked to comment on the overlap between related submissions. The IJBEM reviews all the submitted manuscripts.

### 2. Copyright Notice

Authors who publish with IJBEM agree to the following terms:

- Authors retain copyright and grant the journal right of first publication with the work simultaneously licensed under a Creative Commons Attribution License that allows others to share the work with an acknowledgment of the work's authorship and initial publication in IJBEM.

- Authors are able to enter into separate, additional contractual arrangements for the non-exclusive distribution of the journal's published version of the work (e.g., post it to an institutional repository or publish it in a book), with an acknowledgment of its initial publication in IJBEM.

- Authors are permitted and encouraged to post their work online (e.g., in institutional repositories or on their website) prior to and during the submission process, as it can lead to productive exchanges, as well as earlier and greater citation of published work.

### 3. Privacy Statement

The names and email addresses entered in this journal site will be used exclusively for the stated purposes of this journal and will not be made available for any other purpose or to any other party.
