Each manuscript is reviewed by at least two independent reviewers from outside the institutions of the authors’ affiliation.

Affiliation of at least one of the reviewers must be in the other country than the nationality of the authors of the manuscript.

The authors of the manuscript do not now the identities of the reviewers. In principle a double-blind review process is practiced, i.e. the reviewers do not now the identities of the authors.

The review must be provided in the written form. It should consist of the filled checklist for reviewers followed by reviewer’s comments ended concluded with a clear statement on acceptance or rejection of the manuscript.

The reviewers form with a checklist for reviewers are provided by the Editor together with the manuscript to be reviewed. It can also be viewed at the web pages of the journal.

The names of the reviewers of the manuscripts published in the current year are listed every year at the web pages of the journal.
