

Editorial Policy

Archives of Mechanical Technology and Materials (AMTM) publishes papers focused on the advances in mechanical engineering, automation and robotics, materials science and materials processing. The scope of Journal concerns the publishing original and review papers as well as short communications. The Journal will promote an exchange of ideas and significant developments which contribute to progress in manufacturing techniques, materials, models, processes, and systems.

AMTM does not charge for the publication. This yearbook uses Double Blind Peer Review, which means that both the reviewer and author identities are concealed from the reviewers, and vice versa, throughout the review process.

Manuscripts are accepted with the understanding that they represent original research, except for review articles, and that they have not been copyrighted, published, or submitted for publication elsewhere.
