Publication Guidelines

MMCE covers a wide range of topics from Civil Engineering field and is ready to publish, high quality standards, state-of the-art, peer-reviewed papers, coming from the academic and research community, and industry as well. MMCE addresses both theoretical developments and practical applications related to Civil and Structural Engineering, Earth and Environmental Science, Engineering Thermodynamics, Transport Phenomena, Structural Foundations, Hydraulic Engineering fields.

To be acceptable for publication in the MMCE journal, a manuscript must address valuable and of significant interest scientific issues for the Civil Engineering community, free of evident commercial or private interest.

General MMCE Policies

MMCE serves the Civil Engineering community and our societies, aiming to effectively contribute to the development, innovation and progress in this field. MMCE publishes papers that present the state-of the-art results from research and practice. The authors are requested to make sure that appropriate research ethical standards are strictly followed in their work, when submitted to be published by MMCE. The MMCE staff fully supports the authors during the entire evaluation process and is committed to ensure that the ethical standards, related to submittal, review, and publication of manuscripts, will be strictly followed.
