Publication Ethics and Publication Malpractice Statement (based on Elsevier recommendations and COPE’s Best Practice Guidelines for Journal Editors)

JoLaCE is committed to ensuring ethics in publication and quality of articles. Conformance to standards of ethical behaviour is therefore expected of all parties involved: Authors, Editors, Reviewers, and the Publisher.

Authors should present an objective discussion of the significance of research work as well as sufficient detail and references to permit others to replicate the experiments. Fraudulent or knowingly inaccurate statements constitute unethical behaviour and are unacceptable. Review articles should also be objective, comprehensive, and accurate accounts of the state of the art. The authors should ensure that their work is entirely original, and if the work and/or words of others have been used, this has been appropriately acknowledged. Plagiarism in all its forms constitutes unethical publishing behaviour and is unacceptable. Submitting the same manuscript to more than one journal concurrently constitutes unethical publishing behaviour and is unacceptable. Authors should not submit articles describing essentially the same research to more than one journal. The corresponding author should ensure that there is a full consensus of all co-authors in approving the final version of the paper and its submission for publication.

Editors should evaluate manuscripts exclusively on the basis of their academic merit. An editor must not use unpublished information in the editor’s own research without the express written consent of the author. Editors should take reasonable responsive measures when ethical complaints have been presented concerning a submitted manuscript or published paper.

Any manuscripts received for review must be treated as confidential documents. Privileged information or ideas obtained through peer review must be kept confidential and not used for personal advantage. Reviews should be conducted objectively, and observations should be formulated clearly with supporting arguments, so that authors can use them for improving the paper. Any selected referee who feels unqualified to review the research reported in a manuscript or knows that its prompt review will be impossible should notify the editor and excuse himself from the review process. Reviewers should not consider manuscripts in which they have conflicts of interest resulting from competitive, collaborative, or other relationships or connections with any of the authors, companies, or institutions connected to the papers.

Policy for Handling Complaints

If the Journal receives a complaint that any contribution to the Journal infringes copyright or other intellectual property rights or contains material inaccuracies, libellous or otherwise unlawful materials, the Journal will investigate the complaint. Investigation may include a request that the parties involved substantiate their claims. The Journal will make a good faith determination whether to remove the allegedly wrongful material. A decision not to remove material should represent the Journal’s belief that the complaint is without sufficient foundation, or if well - founded, that a legal defence or exemption may apply, such as fair use in the case of copyright infringement or
truthfulness of a statement in the case of libel. Journal should document its investigation and decision.

**Policy on Conflicts of Interest**

The Journal will only publish articles after the author(s) have confirmed that they have disclosed all potential conflicts of interest.

The journal has a policy of “Zero Tolerance to Plagiarism”. We check plagiarism via two methods: reviewer check and plagiarism prevention tool.
