REFERENCES

- All references cited in the text are to be listed at the end of the paper.
- The manuscript should be carefully checked to ensure that the spellings of authors' names and publication years are exactly the same in the text as in the reference list.
- Do not type author's and editor's names in capitals.
- In the text refer to the author's name (without initials) and year of publication, followed - if necessary - by a short reference to appropriate pages.

Examples: "Because Peterson (1994) has shown that...". "This is in agreement with results obtained later (Kramer, 1996, pp. 12-16)". "...vertebrate and invertebrate faunas (Turek, 1986, 1989; Pšenička, 2010, 2011a)...."
- If reference is made in the text to publications written by more than two authors the name of the first author should be used, followed by "et al." This indication, however, should never be used in the list of references. In this list names of authors and all co-authors must be given in full.
- References in the text should be arranged chronologically.
- The list of references should be arranged alphabetically by authors' names, and chronologically per author. If an author's name in the list is also mentioned with co-authors, the following order should be used: Publications of the single author, arranged according to publication year - publications of the same author with one co-author, arranged according to publication year - publications of the author with more than one co-author, arranged according to publication year.
