

Editorial Policy

Scope

The Polish Journal of Chemical Technology (PJCT) publishes quarterly and its goal is publication of research results in all areas of chemical engineering, environmental protection, (bio)catalysis, chemical (bio)technology, (bio)chemical engineering, environmental chemistry, food chemistry, macromolecular chemistry, materials chemistry, nanotechnology etc. The primary mission of PJCT is to assist Central and Eastern European researchers in communicating their achievements to the global scientific community, nevertheless, contributions from other regions of the world are by no means excluded. The journal is peer-reviewed. The language of the journal is English.

Manuscript submission

Manuscripts preferred for publication in PJCT are those which:

1. contain original work - which is not published elsewhere in any medium by the authors or anyone else, and is not under consideration for publication in any other medium. This restriction does not apply to review articles
2. are focused on the core aims and scope of the journal - PJCT is a scientific journal publishing fundamental research results from all fields of chemistry
3. are clearly and correctly written - should contain all essential features of a complete scientific paper, should be written in a clear, easy to understand manner, and be readable for a wide audience of chemists
4. are written in English - should be clearly and grammatically written, in an easily readable style. Attention to detail of the language will avoid severe misunderstandings which might lead to rejection of the paper (Please note that authors who are not native-speakers of English can be provided with help in rewriting their contribution in correct English)
5. are delivered in electronic format

Manuscripts should be submitted via www.editorialsystem.com/jpct

PJCT publishes research articles, communications and review papers.

- a) Research Articles
- b) Short Communications - short reports on new and exciting results of high urgency
- c) Reviews - topical mini(reviews) as well as full critical reviews on important subjects reflecting new trends in the field of interest of the PJCT

Peer review process

All manuscripts submitted for potential publication are sent to at least two independent reviewers. However a submission may be declined by the Editor in Chief without review, if deemed inappropriate for reasons other than scientific merit.

- a) choice of reviewers

The Editors of PJCT seek advice from experts in the appropriate field. Research articles and communications are reviewed by a minimum of two reviewers, review papers by at least three.

- b) suggestions from authors

Authors are requested to suggest persons competent to review their manuscript. However, please note that this will be treated only as a suggestion, and the final selection of reviewers is exclusively the Editor's decision.

The Editors are fully responsible for decisions about manuscripts. The final decision whether to accept or reject a paper rests with them. The Editor only communicates the final decision, and informs the authors about further processing.

Revised manuscript submission

When revision of a manuscript is requested, authors should return the revised version of their manuscript as soon as possible. Prompt action may ensure fast publication if a paper is finally accepted for publication in PJCT. If it is the first revision of an article authors need to return their revised manuscript within 60 days. If it is the second revision authors need to return their revised manuscript within 14 days. If these deadlines are not met, and no specific arrangements for completion have been made with the Editor, the manuscript will be treated as a new one and will receive a new identification code along with a new registration date.

Final proofreading

Authors will receive a pdf file with the edited version of their manuscript for final proofreading. This is the last opportunity to view an article before its publication on the journal web site. No changes or modifications can be introduced once it is published. Thus authors are requested to check their proof pages carefully against manuscript within 3 working days and prepare a separate document containing all changes that should be introduced. Authors are sometimes asked to provide additional comments and explanations in response to remarks and queries from the language or technical editors.

Reprints

After publication of the manuscript, the corresponding author is notified by email, and receives information about free access to the journal content through the website

Errata

If any errors are detected in the published material they should be reported to the Editor. The corresponding authors should send appropriate corrected material to the Editor via e-mail.

Open Access License

A properly completed License to publish must be provided for each submitted manuscript. A form is sent via website after completing the review process.
