Data and Information Management (DIM) aims to promote cross-disciplinary data-driven information management research, especially targeting large-scale datasets in scientific/academic, government and business domains. The journal focuses on innovative theories and technologies related to data and information processing; creative applications of theories and techniques including patterns, models, and processes in various datasets; and compatible management processes and social systems required for the realization of the substantial value that data and information offers to organizations.

Specific topic areas may include but not limited to: innovative theories and technologies in data-driven information analytics, including knowledge discovery and organization, cloud computing, machine learning, information visualization, and human-computer interaction; information organization and retrieval, and information search behaviors in data intensive environments such as social media; open data, information sharing, and information services; novel methods, algorithms, and processes of conducting data/text/Web mining etc.

Benefits of publishing in the journal:

▶ Constructive and fair peer review by international experts in the field
▶ Articles abstracted by online indexing services and databases
▶ Immediate and free access to its fulltext articles as soon as they are available online.
▶ High international visibility of published articles due to Open Access
▶ The open access fees (article-processing charges) are fully sponsored by the journal owner.
▶ Authors are able to publish in the journal without charges of any form.
▶ Efficient route to fast-track publication

Journal owner:

Wuhan University (WHU) is a comprehensive and key national university directly under the administration of the Ministry of Education. It is also one of the „211 Project” and „985 Project” universities with full support in the construction and development from the central and local government of China.

The history of Wuhan University can be traced back to Ziqiang Institute, which was founded in 1893 by Zhang Zhidong, the then governor of Hubei Province and Hunan Province in the late Qing Dynasty. In the process of development and evolution, the institute changed its name several times before it was finally named Wuhan National University in 1928. It is one of the earliest comprehensive national universities in modern China. By the end of 1946, the university had established 6 colleges, the colleges of liberal art, law, sciences, engineering, agriculture and medicine. In 2000, an amalgamation of the former Wuhan University, Wuhan University of Hydraulic and Electric Engineering, Wuhan Technical University of Surveying and Mapping, and Hubei Medical University was announced, which ushered in a new era in its 100-odd years of development.

For the past century, Wuhan University has built an elegant palatial architectural complex of primitive simplicity which blends perfectly the eastern architectural style with that of the west. It is honored as the „Most Beautiful University in China.” Furthermore, Wuhan University’s centennial humanistic accumulation boils down to its succinct motto, that is, „Self-improvement, Perseverance, Truth-seeking & Innovation.”

Since its establishment, Wuhan University has cultivated more than 300 thousand professional talents in various occupations, among whom there are over 100 members of the Chinese Academy of Science and the Chinese Academy of Engineering. They have made great contribution to the national construction and social advancement. The remarkable achievements of Wuhan University have won itself an extensive international reputation. In 1999, the world renowned journal Science listed Wuhan University as one of the most prominent institutions of higher education in China.
