

## **Recognized publication ethics and malpractice statement**

The Editors of scientific quarterly *Management Systems in Production Engineering* uphold the best standard of publication ethics and take all possible measures against publication malpractices. We adhere to the principles outlined below, which have been developed to ensure the accurate, timely, fair and ethical publication of scientific papers. The Board of Editors of *Management Systems in Production Engineering* has adopted clear and rigorous guidelines for best practices in scientific publishing. It will benefit our authors, editors and readers as we strive for a trustworthy, transparent and efficient publishing process. The rules for reviewing articles adopted by the *Management Systems in Production Engineering* also conform to the guidelines of the Polish Ministry of Sciences and Higher Education and relate to the ethical principles and best practice guidelines for ensuring scientific integrity and preventing misconduct. The adopted code of conduct for Editors, Authors, Reviewers and Publishers is compliant with the Code of Conduct and guidelines provided by COPE (Committee on Publication Ethics - [www.publicationethics.org](http://www.publicationethics.org)).

### ***ETHICAL GUIDELINES FOR AUTHORS***

The Editors' decision to accept or reject a paper for publication is based entirely on the paper's importance, originality and clarity, and the study's relevance to the Journal topics.

Articles are published after the authors agree to transfer all copyrights to *Management Systems in Production Engineering*. The authors should warrant the full originality of their work that should not contain plagiarism or fraudulent data. If they have used the work/words of another author, this has to be cited or quoted. Published articles should contain a list of references and a statement on financial support, when relevant. Also, the authors should not submit manuscripts that have been published in the same form in other journals. If papers closely related have been published elsewhere or presented in different scientific meetings the author must state this when submitting the paper.

Articles accepted for publication in *Management Systems in Production Engineering* cannot violate the canon of scientific rectitude or ethical principles and standards in science research. The examples of scientific dishonesty include but are not limited to the following phenomena: "ghostwriting" - when a person significantly contributes to the publication for another person who is named as or presumed to be the author, without disclosing this contribution, or not being acknowledged in the publication), and "guest authorship", i.e. honorary authorship (the granting of authorship status to individuals who have made little, if any, contribution to the article). Guest authorship is a violation of academic integrity standards, it undermines the credibility and scientific independence of the author.

The authors are obliged to participate in peer review process.

If an author discovers errors or inaccurate data in his/her manuscript, it is the author's obligation to inform the editor and to withdraw or correct the paper. All authors are obliged to provide retractions or corrections of mistakes.

The authors have the right to present the published articles at conferences or congresses.

All authors must disclose any financial or personal relationship with people or organizations that could inappropriately influence their work. All sources of financial support have to be mentioned.

Proper acknowledgment must be given. The authors have to mention any publication, person or law that have influence the nature and the results of their work.

### ***ETHICAL GUIDELINES FOR EDITORS***

The editor of *Management Systems in Production Engineering* can decide which of the article submitted to the journal should be published, while striving to meet the need of readers and authors. Preserving the anonymity of referees is felt to be very important.

The editor should have no conflict of interest with respect to articles they reject or accept.

The editor has to follow journal's policy in matter of copyright and plagiarism.

The journal's editor should evaluate the manuscripts for their scientific content no matter the race, nationality, religious beliefs, gender or sexual orientation of the authors.

The editor may give information about the manuscript content only to the author, reviewers, publisher or other editorial advisers. When errors are found, editors are expected to publish relevant amendments or to publish information about the cancelation of publication.

In case of unpublished materials this should not be used by the editor in its benefit without the written permission of the author.

The editor has to take into consideration any unethical publishing behaviour even it is reported or discovered many years after publication.

### ***ETHICAL GUIDELINES FOR REVIEWERS***

Reviewers should not assess papers susceptible of conflict of interest resulting from collaboration or any other relationship with the authors.

The reviewers have to be objective, personal criticism is being inappropriate. He/She should sustain their viewpoints with solid arguments.

Reviewers have to identify relevant publications not cited by the author and notify any similarity with other published article.

In case of unpublished materials this should not be used by the reviewer in his/her benefit without the written permission of the author.

Reviewed articles should be treated confidentially. All reviews are anonymous - the author does not know the names of the reviewers and the reviewers do not know name of the author (so-called "double-blind review").

### ***PUBLISHING ETHICS***

Once published all versions of the papers will remain available. When multiple versions of the same paper are available, the Editors will ensure that these articles are clearly labelled with the date of publication and number of the version.

Uploading electronic versions of papers on *Management Systems in Production Engineering* website is an essential component of the publishing process. Papers are posted on the website of the Journal ([Archive](#)) within a period not exceeding two weeks from the release of the original version (printed).

The Journal has adopted the DOI (digital object identifier) system to enable accurate citation and stable online availability of published articles.

Translations of previously published articles are not acceptable. It is only allowed to publish translations of expanded version of papers, reports presented at conferences and other scientific meetings.

Any violation of academic integrity standards and all examples of such practices will be disclosed and the appropriate bodies informed (e.g. the institutions which employ the author, scientific societies and associations, scientific editors, etc.). The editorial board will keep record of any manifestation of violating the ethical principles and standards in science.
