

Applied Computer Systems

EDITORIAL POLICY

“Applied Computer Systems” is an open access scientific journal published biannually in May and December electronically by De Gruyter Open. The owner of the Journal is Riga Technical University. Articles are assigned a DOI number (Digital Object Identifier) whereby it becomes possible to search and cite them without delay.

The journal serves for experience generation in computer science and information technologies use in different applications and is a source of information for the industry practitioners, for academic personnel and students.

The journal publishes research papers describing new results, original ideas and applications or reports on the development and maintenance of actual systems addressing issues concerning theory, development, management and applications of advanced applied computer science.

The topics covered by the journal are Artificial Intelligence; Computer Applications; Data; Information Technology and Systems; Programming Technologies; Software Engineering.

Besides, the reader will find papers on conception of framework for automated creation of graph visualisation systems, theoretical basis and practical usage of simulation for creating solutions for data management systems, modelling of software systems and business processes, comparison of programming languages, intelligent tutoring systems, semantic web development, applications of cloud-based services, issues of dynamic wireless networks, as well as surveys and papers focused on different other specific topics.

The aim of the publishers is to encourage the applied research by granting free publication possibilities to professionals in the software field, young scientists and doctoral students.

The authors of articles are researchers from various educational and research institutions and companies not only from different European countries, but also from Africa, North and South America, Asia and Australia.

The manuscripts are accepted in English. The submissions should be made electronically using [Editorial System](#) and comply with the [Guidelines for Authors](#).

The submitted manuscripts are double blind peer reviewed by two experts of the relevant field. The submitted manuscripts are automatically screened for originality in the CrossCheck System. The authors are provided with feedback. Authors are required to revise the paper based on the comments made by the reviewers and to submit revised paper for reevaluation. After the peer review the managing editor assesses the paper’s suitability for publication in the journal and informs the authors about the decision.

After the article has been accepted for publication it goes to the production editor. The production editor makes any necessary corrections and sends the proof to the author for approval.

The journal does not have article processing charges (APCs) nor article submission charges.

The authors are asked to sign License to Publish governed by the Creative Commons Attribution license in which the author warrants that the article is original, written by stated author/s, has not been published before, contains no unlawful statements, does not infringe the rights of others, is subject to copyright that is vested exclusively in the author and free of any third party rights, and that any necessary written permissions to quote from other sources have been obtained by the author/s.

All articles published in the journal are archived in the OA repository of Riga Technical University. The print version of the journal is published on the request by RTU Press – the publishing house of Riga Technical University.
