

Helminthologia publishes peer-reviewed original scientific articles, review articles and research notes on various aspects of pure and applied helminthology, particularly on helminth and endo-parasites in human and animal hosts and plant parasites of environmental, health and veterinary importance along with taxonomic contributions. Book reviews and Letters to the Editor offering comments on material published in this journal are also welcome.

General Instructions

Submission of a manuscript implies that the work described has not been published before (except in the form of an abstract or as part of a published lecture, or thesis); that it is not under consideration for publication anywhere else; that its publication has been approved by all co-authors, if any, as well as by the responsible authorities – tacitly or explicitly – at the institute where the work has been carried out. The publisher will not be held legally responsible should there be any claims for compensation.

The authors transfer the copyright of the paper to the Helminthologia by completing the OPEN ACCESS LICENCE form, available at <https://www.degruyter.com/view/j/helm> (Supplementary Information), or <http://www.editorialmanager.com/helminthologia> and sending the form as an attachment to the Editorial Office e-mail address at helminth@saske.sk.

Online Manuscript Submission

Helminthologia offers authors and reviewers the option of online manuscript submission and review system available at <http://www.editorialmanager.com/helminthologia/>. Authors should register themselves first as new users and then upload their manuscripts following the on-screen instructions. Should you encounter any difficulties while submitting your manuscript online and wish to submit it via e-mail, please contact the Managing Editor of the Helminthologia Dr. Zuzana Vasilková, e-mail: helminth@saske.sk. However,

the authors are strongly encouraged to use online submission system to facilitate even quicker and more efficient processing. Upon successful initial review and compliance with journal instructions for authors all manuscripts submitted through Editorial Manager® are subject of single-blind peer review process with at least two reviewers involved.

Electronic submission substantially reduces the editorial processing and reviewing times and shortens overall publication times. Please note that manuscripts submitted in printed form will be returned for online submission.

Paper Writing Guide

Manuscripts, written in English, should be submitted in MS Word (97 or higher) either as standard DOCUMENT (.doc or .docx) or RICH TEXT FORMAT (.rtf). Use a normal plain font (e.g. Times New Roman) for text. All references should be written in a format as requested by journal guidelines and with DOI-s provided. Any manuscript not following these basic rules will not be submitted to the preliminary review. The MS will be returned for revision and correction.

Arrangement of the Manuscript

Title page should comprise a concise but informative title, name of author(s) without titles, their affiliations and addresses and personal e-mail addresses.

- Text:
 - Introduction
 - Material and Methods
 - Ethical Approval and/or Informed Consent
 - Results
 - Discussion (Results and Discussion may be combined in one section)

Authors are asked to ensure that line numbering is included in the main text file of their manuscript at the time of submission to facilitate peer-review.

Elements of the Manuscript

Please arrange the elements in this order:

- Summary
- Conflict of Interest
- Acknowledgement
- References
- Tables, Figures, Illustrations, Legends

Summary must accompany every article. It should present the most important results and conclusions in not more than 300 words. Following the text of the abstract, 3 to 6 key words, separated by semi-colons, should be listed for indexing.

Text – General Rules

We suggest that the English language is proofread, edited for its correctness before submission of the manuscript.

Genus and species names should be in italics. The common names of animals should not be capitalized. When describing a new species (and other new taxa) please provide an exact address where the specimens are deposited, including the collection numbers of holotypes, paratypes, etc. The rules governing biological nomenclature laid down by the International Code for Zoological Nomenclature should be followed.

Please try to restrict the use of abbreviation to the SI symbols and those recommended by the International Nomenclature. Abbreviations should be defined in brackets after their first use in the text. Standard SI units may be used without definition in the body of the paper.

Ethical Approval and/or Informed Consent

The articles such as original research articles, review articles, case reports or clinical studies must be supplied with ethical statements. Statements are required if the work involves the use of animal or human subjects. The authors should ensure that all research has been reviewed and approved by appropriate institutional committee.

- Studies on patients or volunteers require ethics committee approval and informed consent, which should be documented in the submitted manuscript.
- When reporting experiments on animals, authors should indicate whether the international, national and/or institutional guidelines for the care and use of animals have been followed, and that the studies have been approved by a research committee at the institution at which the studies were performed.

Violations of this policy may result in delay of publication, retraction of the article, or notification of your institution.

The following statements regarding ethical approval policy are suggested to be included in the text:

- ✓ All procedures performed in studies involving human participants were in accordance with ethical standards of the institutional ethical committee and with the 1964 Helsinki declaration and its later amendments.
- ✓ Research related to human use has been complied with all the relevant national regulations, institutional policies and in accordance the tenets of the Helsinki Declaration, and has been approved by the authors' institutional review board or equivalent committee.
- ✓ For this study formal consent is not required.
- ✓ Informed consent has been obtained from all individuals in this study.
- ✓ This article does not contain any studies with human participants or animals by any of the authors.
- ✓ The study protocol No.... was approved by ethical/IACUC committee at the (add name of the institution).
- ✓ All applicable national and institutional guidelines for the care and use of animals were followed
- ✓ ARRIVE (Animal Research: Reporting of *In Vivo* Experiments) guidelines for the use of animals were followed.
- ✓ Animal care and handling were carried out in accordance with institutional guidelines
- ✓ Mice were housed and maintained in a pathogen-free environment at the Department of Comparative Medicine. All experiments were performed according to the protocol No.... approved by (add name of the institution) IACUC.
- ✓ The research related to animals has been complied with all the relevant national regulations and institutional policies for the care and use of animals.

Conflict of Interest

- All articles must have Conflict of Interest statements at the end of each article. A competing interest is anything that interferes with, or could reasonably be perceived as interfering with, the full and objective presentation, peer review, editorial decision-making, or publication of research or non-research articles submitted to Helminthologia. Competing interests can be financial or non-financial, professional, or personal. Declaration of all potential competing interests is a requirement for the successful manuscript submission.

The following statements regarding conflict of interest are suggested to be included in the text:

- ✓ Authors state no conflict of interest.
- ✓ Authors have no potential conflict of interest pertaining to this submission to Helminthologia.
- ✓ Authors have following potential conflict of interest to disclose.

For more details please see https://www.degruyter.com/view/supplement/s23915463_Author_s_Statement.pdf

Acknowledgement

Acknowledgements of people, grants, funds, etc. should be listed in a separate section before the References.

References

All publications cited in the text should be presented in the list of references. The authors should provide complete, correct and properly structured references. **If the article or book has DOI number, the authors are required to include it in the references**, which may allow automatic creation of active links, adding a greater value to a particular publication.

Please use the following system for arranging each reference in the list:

Book

ANDERSON, R.C. (2000): *Nematode Parasites of Vertebrates, their Development and Transmission*. 2nd Edition, Walingford, UK, CABI Publishing, 650 pp.

Book chapter

OVERSTREET, R.M., CURRAN, S.S. (2005): Family Haploporidae Nicoll, 1914. In: JONES, A., BRAY, R.A., GIBSON, D.I. (Eds) *Keys to the Trematoda*. Volume 2. London, UK: CABI Publishing and The Natural History Museum, pp. 29 – 165

Proceedings from a conference

Web page

Australasian Marsupial & Monotreme Specialist Group (1996): *Zaglossus bruijnii*. In: *IUCN2004. 2004 IUCN Red List of Threatened Species*. Retrieved March 21, 2008 from <http://www.iucnredlist.org>

Computer software

SWOFFORD, D.L. (2001): PAUP*-Phylogenetic analysis using parsimony (and other methods), Version 4.0b10 [computer software]. Sunderland, MA: Sinauer Associates

Thesis

NAGY, S. (1996): *Time dependent clinical decision support systems for laboratory routine work. Applications for screening of infection with Toxoplasma gondii*. PhD thesis, Austria, Vienna: Vienna University of Technology

The titles of references published in languages other than English should be handled in the following way:

Author name(s) (year): Title in original language (if possible) [Title translated into English]. *Abbreviation of Journal*, vol.(no.): page information (according to type of publication) (In 'language')

see example below:

GUÉGAN, J.F., LAMBERT, A., EUZET, L. (1988): Étude des Monogènes des Cyprinidae du genre *Labeo* en Afrique de l'Ouest, I. Genre *Dactylogyrus* Diesing, 1850. [Monogeneans from Cyprinid fishes of the genus *Labeo* in West African rivers systems. I. Genus *Dactylogyrus* Diesing, 1850.] *Rev. Hydrobiol. Trop.*, 21 (2):135 – 151 (In French)

If you are citing a work written in a **non-Latin script** (e.g., Chinese, Greek, Japanese, Russian), the original title of the reference must be transliterated into the English alphabet or only translated into English followed by indicating the original language.

examples:

BYKHOVSKAYA-PAVLOVSKAYA, I. (1985): *Parazity ryb: rukovodstvo po izucheniyu* [Parasites of fish: Manual on study], Nauka, Leningrad, 121 pp. (In Russian)

or

BYKHOVSKAYA-PAVLOVSKAYA, I.E., KULAKOVA, A.P. (1987): Class Trematoda Rudolphi, 1808. In: BAUER, O.N. (Ed) *Key to the parasites of freshwater fish fauna of the USSR*. Volume 3. Parasitic Metazoans (part two). Leningrad, USSR: Nauka Publishing Leningrad branch, pp. 77 – 198 (In Russian)

● **Titles of references should be given in English. Abbreviation of journal titles should follow the rules of the ISO Journal Title Abbreviations:** <https://www.ncbi.nlm.nih.gov/nlmcatalog/journals>

● **Please provide all authors' names. Do not use et al. in the reference list unless there are more than ten authors.**

Tables and Figures

We encourage authors to submit tables and figures as SEPARATE

files. Please do not insert tables or figures in the text.

Tables

Each table should be numbered consecutively using Arabic numerals and referred to in the text by the number. Please provide a caption to each table, refer to a table in the text and The number of lines should be limited, using 2 horizontal lines separating headings of columns from the data properly plus 1 horizontal line below the Table. Vertical lines should be avoided.

Please, do not present the same data both in Tables and Figures. In general, Figures are preferable to Tables.

Figures

All photographs, graphs, illustrations and diagrams should be referred to as a "Figure" and should be numbered consecutively. Please insert keys and scale bars directly into figures. Relatively small text and great variation in text sized should be avoided. Provide a detailed legend (without abbreviations) to each figure and refer to a figure in the text.

For vector graphics, the preferred format is EPS; for graphs MsExcel and MsWord files are also acceptable.

Scanned line drawings and line drawings in bitmap format should have a minimum resolution of 1200 dpi.

Halftone art – photographs, drawings, or paintings with fine shading, etc. should have a minimum resolution of 300 dpi. Please use TIFF format for them.

Combination artwork should have a minimum resolution of 600 dpi.

Legends

The legends should be listed in a separate file.

Proofreading

Authors are informed by an e-mail that a temporary URL has been created from which they can obtain their proofs. Proofreading is the responsibility of the author. Authors should make their proof corrections (formal corrections only) on a printout of the pdf file supplied, checking that the text is complete and that all figures and tables are included. After online publication, corrections can only be made in exceptional cases and in the form of an Erratum, which will be hyperlinked to the article.

PDF copy for personal use is provided free of charge.

Journal does not have any article submission charges.

However, upon successful completion of peer review process all accepted papers are subject to the Article Processing Charges (200 EUR/per article). For a detailed info, please visit the journal owner website at <http://pau.saske.sk/helm/> or contact journal Editorial Office at helminth@saske.sk.

Ahead of Print (AOP)

Accepted and proofed papers will be published online as Ahead of Print papers prior the availability of particular issue in open access online and print formats. AOP papers can already be cited by their DOI. After release of the open access and printed versions, the paper can also be cited by issue and page numbers.
