Maciej Jędrusik, Faculty of Geography and Regional Studies,
University of Warsaw, Poland

Managing Editor

Izabela Karsznia, Faculty of Geography and Regional
Studies, University of Warsaw, Poland

Journal contact

miscellanea.geographica@uw.edu.pl

The aim of the journal is to present the diversity of geography and to form a contemporary image of the subject as an interdisciplinary science. We therefore publish texts on physical, socio-economic and regional geography, as well as papers outlining research results from the fields of social studies, historical and political studies, regional studies and regional economics – from the local, regional and even the global perspective.

The journal is intended to be of particular interest to those conducting research into the contemporary problems of development – its natural, social and economic circumstances, as well as its effects. Research published in the journal covers issues of sustainable development, contemporary climate change, the spatial aspects of demographic processes (especially migration and urbanization), as well as modern methods of measuring and diagnosing these processes (geoinformation and remote sensing of the environment) in natural resources, social systems and the built environment, and relevant developments in geography in both developed and developing countries.

Author Benefits:

- ▶ **Open Access:** unlimited and free access for readers
- ▶ **Coverage by Leading Indexing Services**, e.g.: Web of Science Core Collection ESCI (Clarivate Analytics), SCOPUS (Elsevier), ERIH PLUS and over 30 more services
- ▶ **Submissions accepted in a broad scope of scientific disciplines:** geography, regional studies, environmental sciences, economics, social, historical and political sciences
