1. Submitting Papers

Submission of a paper implies that it is original research work, which has not been published previously, and is not under consideration for publication elsewhere, and that, if accepted, it will not be published elsewhere in the same form, in English or in any other language, without the written consent of the Transylvanian Museum Society.

If revision of the original manuscript is required, authors will have a maximum of four weeks (from receipt of the referees comments) to revise and re-submit. A revised manuscript received by the Editor later than two weeks after the author's receipt of the referees' comments will be treated as a new submission. Authors are allowed to revise the original manuscript only once. If further revisions are requested the manuscript will be treated as a new submission.

Papers which do not follow the instructions below may not be accepted for publication.

For **initial submission** the complete paper must be uploaded in Word format. The order of the manuscripts should be as follows: title, author(s) and affiliation(s), telephone and fax numbers, e-mail address of the corresponding author, abstract, keywords, text, references, legends of figures and tables. Tables and figures can be inserted into the main text or added at the end of the manuscript. The sequences of pages, tables, figures should be numbered with Arabic numerals. *If your submission is incomplete, it has to be completed within 3 months; otherwise it will be deleted from our database. Failing this deadline, the manuscript should be submitted as a new one.*

For **submission of the revised article** the following must be uploaded:

- a text file containing the revised text, references, acknowledgement, legends of figures and tables, prepared according to the specification described below. The preferred file format is Word (.doc) or rich text (.rtf).
- a separate image file of each figure. Ensure that figures will be legible and comprehensible at final size and are of sufficiently high resolution (see instruction below). Permitted file formats are JPEG (.jpg) and TIFF (.tif).
- a response to the reviewer's comments in Word or PDF (preferred) file.

Proofs in PDF format can be downloaded from Manuscript Central after the notification sent to the corresponding via e-mail. The proofs should be returned within 48 hours of receipt. It is therefore essential to provide full e-mail addresses of each author. Corrections should be restricted to minor corrections (like typesetting errors, etc.). Please scan the corrected pages of the proofs and then upload them through the manuscript central.

2. Copyright

All authors must sign the Open Access License before the article can be published. This transfer agreement enables the Publishers to protect the copyrighted material for the authors, but does not relinquish the author's proprietary rights. Authors are responsible for obtaining permission to reproduce any figure for which copyright exists from the copyright holder.

3. MTK Template file

Authors are encouraged to submit their papers in Word for Windows using the MTK template file. Please, attach your paper in PDF format too.

Title of Paper Style „AMT-focim”

First AUTHOR¹, Second AUTHOR², Third AUTHOR³... (The names of authors in alphabetical order if the contribution is equal; in decreasing amount of the contribution otherwise. First name precedes the surname Style „AMT-Szerzok”)

¹Institution name: University, Faculty, Department. City, Country, firstauthor@email.org

²Institution name, secondauthor@email.org

³Institution name, thirdauthor@email.org

Please don't enumerate more than five authors if possible. Style „AMT-elerhetoseg”

Abstract

The abstract length must encounter 5-10 lines, style „AMT-Abstract”.

Keywords: Please indicate 3-5 keywords, style „AMT-kulcssavak”.

1. Section title (style „AMT-Fejezet”)

1.1. Subsection title (style „AMT-Alfejezet”)

1.1.1. Paragraph title (style „AMT-pontcim”)

xx. Conclusions

(The last section of the paper is the conclusions where the results of the research are emphasized.)

Text of sections and subsections: Style „AMT-test”. Please formulate the text respecting the rules of scientific formulation. The length of the paper must be of 4 pages. Please use the specific styles of the present template!

The easiest way of word processing consists in saving this template using another name and simply typing the text in the correspondent places. Inserting of figures and equations requires the producing of a blank line and followed by the use of the paste special command applied for graphical or equation objects. Finally the correspondent style must be chosen from the style box.

Pictures and figures are inserted inline with the text mode, in an empty row. Please avoid the floating modes. Apply the style „Ábra”. Only high resolution pictures or vector graphic figures are accepted. Photos must be sharp and clear. The quality of pictures and figures must fulfill the camera ready quality. **Also you must send the pictures and charts in JPG or XLSX format files!** Referencing of figures must be emphasized in the text using the **bold**.

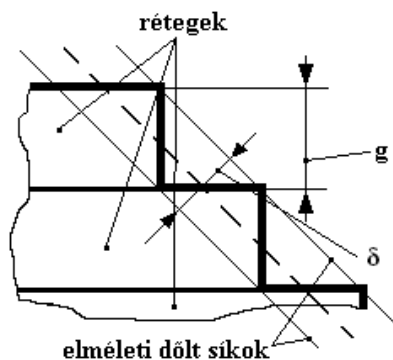

Fig. 1. the caption must give a short explanation on the figure. Style: „Ábrafelirat”, **Fig. Xx.** in Bold, regular.

Tables must not exceed the column if possible. If this is not possible a section brake must be inserted with the attribute continuous. The new section must be formatted as single column. Table will be here inserted. A new section brake must be inserted, and the following section returns to the two column style. Table must be centered. Lining and structure is free, but captioning must be added over the table as shown in the example below:

Table 1. The caption must be formatted with the style: „Ábrafelirat”

aa	dd	gg
bb	ee	hh
cc	ff	ii

Equations must be numbered. Equation number is preceded by a right positioned tab. Follow the example below:

$$\mathbf{r}_1 = \begin{pmatrix} \sin \alpha & -\cos \alpha & 0 & a^2 \\ \cos \alpha & -\sin \alpha & 0 & -b \\ 0 & 0 & 1 & c \\ 0 & 0 & 0 & 1 \end{pmatrix} \mathbf{r}_0 \quad (1)$$

Equation reference is made with the use of round brackets like the following: (1). **Equations must be typed with MathType 6.0. Equation editor 3.0 was retracted by Microsoft.** Please type equations with respect to the AMS directives as follows: italic for variables, straight for function, bold for vector or matrix is, bold-italic for tensors. Vertices must be typed with straight boldface and underlined.

Enumeration

Please follow the example below:

- first item closed with semicolon;
- second item closed by semicolon;
- ...;
- last item closed by period.

It is formatted using style „Enum” As new item introductory symbol use the long dash (Alt+0150) instead of points, asterisks or other symbols.

References in text: Indicate references by number(s) in square brackets in line with the text. The actual authors can be referred to, but the reference number(s) must always be given.

Example: '..... as demonstrated [3,6]. Barnaby and Jones [8] obtained a different result'

3. References (at the end of your publication)

The references must be carefully chosen. **Only** those items can be attached to the reference list that were used in the elaboration process of the paper and are also cited through it. The bibliographic items must contain any element that ensures the finding of the cited paper. **Please do not refer to pages of wikipedia!**

References are formatted with the style **Style „AMT-Irodalom”**. Number the references (numbers in square brackets) in the list in the order in which they appear in the text. The space after the right square bracket is recommended to type using the combination Ctrl+Shift+Space.

Number the references (numbers in square brackets) in the list **in the order in which they appear in the text.**

Full reference should be given in a list at the end of the paper in the following form with examples.

Reference to a journal publication:

- [1] van der Geer J., Hanraads J. A. J., Lupton R. A.: *Complete title of the paper*. Complete Name of the Journal, Vol/NoOrIssue. (2018) 5–11.

4. Conclusions

The last section of the paper contents the conclusions where the results of the research are emphasized.
